Grammar High School Bin Qasim

02/2013   *Karachi,Pakistan*

Courses

- Computer Science

WORK EXPERIENCE

Junior React developer
Innovative Widgets

01/2024 - Present   *Karachi,Pakistan*

Achievements/Tasks

- Successfully integrated third-party APIs into the front end of React applications.
- Integrated MYSQL,Firebase and SQL databases with Node.js for efficient data management in React applications.
- Expertly applied state management, useEffect, data mapping, and hooks in React for optimized front-end development.

Software Engineer
A.F Ferguson & Co

12/2021 - 12/2023

Achievements/Tasks

- Collaborated with designers on UI/UX design decisions and created mockups as needed
- Created interactive components using React , including buttons, input fields, checkboxes and radio buttons
- I have experienced working with in a team as well as a solo developer for the UI/UX for React & Integrate Api to frontend

SKILLS

React Native · React · Html · CSS · Postman · Api Calling · Javascript · SQL · TailwindCSS · Manual Testing · Node js · MYSQL · CPANEL

PERSONAL PROJECTS

Attendance System

- **Uniferoz**
- Mark check-in and check-out on daily basis
- Capture image and get current location
- Integration through api

Water Tanker System

- **Naya Nazimabad**
- Deliver water tanker according to complaint
- Integration though firebase

Square One Capital

- I adeptly implemented Tailwind CSS to create a visually stunning and fully responsive front-end, guaranteeing a seamless user interface across diverse screen sizes.
- Developed a Node.js API with MySQL integration, seamlessly connecting it to the frontend for enhanced functionality and data interaction.
- Develop use case diagrams to facilitate system flow comprehension.
